Capability Statement

WHO WE ARE

Aerial inSight, LLC provides drone-based aerial data and visual intelligence for construction, infrastructure, facilities, and land projects.

Across 85 documented missions, we have supported 34 project sites covering more than 2,100 acres, with experience ranging **from targeted inspections to recurring construction monitoring** extending more than a year.

We combine professional UAS data collection, photogrammetry, and **streamlined digital delivery** to provide accurate, decision-ready information — with one-day turnaround achieved on more than 98% of documented missions.

SERVICES

Construction & Project Documentation

Recurring progress monitoring • Existing-condition documentation • Orthophotos • 360° panoramas • Progress photography

Inspection & Asset Documentation

Roof and pavement inspections • Infrastructure documentation • Oblique imagery • Asset-condition records

Photogrammetry & Geospatial Data

High-resolution orthophotos • 3D models • Elevation products • Site measurements • Stockpile volumes

Aerial Imaging & Site Intelligence

Infrastructure planning support • GIS-ready aerial data • Commercial photography • Aerial video

DIFFERENTIATORS

Proven Recurring Project Support. 53 construction-related missions, including 48 recurring flights across two long-duration development projects and a 33-flight engagement extending more than one year.

Rapid Turnaround. One-day turnaround documented on 84 of 85 missions – more than 98% of our documented project work.

Integrated Digital Delivery. A secure, web-based client portal keeps repeat aerial data organized and accessible, allowing project teams to review imagery and interactive deliverables over the life of a project.

Proven Across Project Scales. 85 missions across 34 project sites totaling more than 2,100 acres, with experience ranging from targeted sub-acre inspections to a 1,596-acre asset management assignment.

SELECTED PROJECT EXPERIENCE

Consistent performance and rapid turnaround have resulted in recurring assignments and long-term project support.

Aerial inSight supports projects through direct UAS services, partnerships with national drone-service providers, and digital project delivery through our client portal platform. Our experience includes projects associated with the organizations shown below.
